LYDIA SIERRA IBATA

Junior Software Developer | Pereira, Risaralda, Colombia | lydia.sierra.ibata@gmail.com |

+57 320 4210510 | github.com/LydiaSierra

PROFESSIONAL SUMMARY

Bilingual (C2) Software Developer with enterprise experience (Globant) and a strong foundation in modern web development (Laravel, React, Node.js). Proven ability to deliver full-stack solutions, integrate AI-assisted workflows into the development lifecycle, and communicate directly with cross-cultural, English-speaking teams. Highly adaptable and focused on building robust, scalable applications for international markets.

TECHNICAL SKILLS

Languages & Web:	JavaScript (Intermediate), PHP, SQL, HTML, CSS, Java (Basic), TypeScript
Frameworks:	React (Intermediate), Laravel, Inertia.js, Angular (Basic)
Databases:	MySQL, SQL
Tools & Platforms:	Git, GitHub, Electron, Tailwind CSS, DaisyUI, GeneXus, WordPress
AI-Assisted Dev:	GitHub Copilot, Claude, Google Antigravity (Task planning, automation, code review)
Design:	Figma, UI/UX design principles

PROFESSIONAL EXPERIENCE

Trainee / Apprentice | *Globant* — Apr 2026 – Oct 2026 | Colombia

- Developed enterprise web applications using GeneXus and its Java generator, adhering to corporate coding standards.
- Designed and implemented relational data structures and performed database modeling using MySQL.
- Contributed to UI/UX design activities, ensuring intuitive navigation and optimal user experience for software applications.

Freelance Web Developer | *Self-Employed* — Jun 2024 – Early 2026 | Pereira, Colombia

- Developed and deployed responsive WordPress websites for various local businesses, significantly improving their digital presence and search engine visibility.
- Executed seamless site migrations across multiple hosting providers, ensuring zero downtime and preserving all core functionalities.
- Designed intuitive website layouts and interface prototypes using Figma, accelerating client approval times and streamlining development.

Bilingual Customer Support Representative | *TaskUs* Prior to 2024 | Colombia

- Delivered technical and customer support entirely in English for international clients, maintaining high satisfaction rates and rapid issue resolution.
- Developed strong cross-cultural communication and problem-solving skills, acting as a direct liaison between end-users and operational teams.

PROJECTS

GeDocs - Document Management System

Laravel, Inertia.js, React, Tailwind CSS

- Contributed to a comprehensive document management system featuring PQRS workflows, role-based access control, and a secure PDF/A document repository.
- Built as a robust academic project that is currently utilized in SENA document-management classes to simulate real-world enterprise workflows.

github.com/LydiaSierra/GeDocs

ReflectDroid - Android Mirroring Desktop App

Electron, React, TypeScript, ADB, scrcpy

- Developed a desktop application that orchestrates Android device detection and launches scrcpy in a separate native window.
- Implemented complex device/session workflows and mirroring configuration controls to optimize the developer testing experience.
